

# SuperLife Invest

#### SuperLife<sup>Age Steps</sup> - Age 50

# Investment update for the quarter ended 30 September 2017

This investment update was first made publicly available on 24 October 2017.

# What is the purpose of this update?

This document tells you how SuperLife<sup>Age Steps</sup> - Age 50 has performed and what fees were charged. The document will help you to compare the stage with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

# **Description of this stage**

SuperLife<sup>Age Steps</sup> automatically adjusts the proportion of your investment in income and growth assets depending on your age. As you get older, the proportion of your investment in more volatile growth assets will be reduced, lowering the expected size of the ups and downs in the value of your investment. This option may be suitable if you are saving for retirement (assumed to be age 65), and assumes you will continue to invest your savings and spend them over your retirement period.

Your SuperLife<sup>Age Steps</sup> - Age 50 investment will be allocated 25% to SuperLife<sup>Income</sup> and 75% to SuperLife<sup>100</sup> (which are managed funds thestage invests in).

Total value of SuperLife <sup>Age Steps</sup> :	\$645,679
The date SuperLife <sup>Age Steps</sup> started:	28 October 2016

# What are the risks of investing?

#### Risk indicator for SuperLifeAge Steps - Age 50 1

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the stage's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <u>www.sorted.org.nz/tools/investor-kickstarter</u>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a stage's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

See the Product Disclosure Statement for SuperLife Invest for more information about the risks associated with investing in this stage.

# How has the stage performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	10.26%

The market index annual return is based on the weighted average annual return of the indices used to assess the performance of the assets that the stage invests in. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose.

# What fees are investors charged?

Investors in SuperLife<sup>Age Steps</sup> - Age 50 are charged fund charges. These are as follows:

	% per annum of stage's net asset value
Total fund charges (estimate)	0.50% <sup>2</sup>
Which are made up of:	
Total management and administr charges (estimate)	ration 0.50% <sup>2</sup>
Including:	
Manager's basic fee	0.27%
Other management and administration charges (estima	te) 0.23%
Total performance-based fees	0.00%
Other charges Doll	ar amount per investor
Administration fee	\$12 per annum
Paper statements fee	\$18 per annum <sup>3</sup>

Investors will not be charged individual action fees for specific actions or decisions. See the Product Disclosure Statement for SuperLife Invest for more information about the fees investors are charged.

Small differences in fees and charges can have a big impact on your investment over the long term.

#### Example of how this applies to an investor

Jess had \$10,000 in the stage on 28 October 2016 and did not make any further contributions. On 30 September 2017, Jess received a return after fund charges were deducted of \$1,097 (that is 10.97% of her initial \$10,000). Jess paid other charges of \$11 (Jess received statements and other SuperLife communications electronically and was not charged the paper statements fee). This gives Jess a total return after tax of \$1,086 for the 11 months and 3 days.

# **Further information**

You can also obtain this information, the Product Disclosure Statement for SuperLife Invest, and some additional information, from the offer register at <u>www.business.govt.nz/disclose</u>.

#### Notes

- Market index returns (as well as actual returns) have been used to complete the risk indicator as SuperLife<sup>Age Steps</sup> Age 50 invests in SuperLife<sup>Income</sup> and SuperLife<sup>100</sup> (together with the NZ Cash Fund), which have not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of SuperLife<sup>Age Steps</sup> Age 50. The risk indicator for SuperLife<sup>Age Steps</sup> Age 50 uses 4 years and 1 month of market index returns for SuperLife<sup>Income</sup> and SuperLife<sup>100</sup>.
- 2 Estimates have been used to calculate the other management and administration charges. These estimates are based on our experience in respect of the other SuperLife managed investment schemes we manage and assume that the stage's actual investment mix will be consistent with the target investment mix set out in this investment update.
- 3 You will only be charged this fee if you choose to receive statements and other SuperLife communications in paper form.
