

SuperLife UK pension transfer scheme

SuperLife^{Age Steps} - Age 20¹

This fund update replaces the fund update for the quarter ended 31 December 2017 that was first made publicly available on 26 January 2018. Note 3 has been updated to refer to 7 December 2017 changes to the total management and administration charges.

Investment update for the quarter ended 31 December 2017

This investment update was first made publicly available on 5 February 2018.

What is the purpose of this update?

This document tells you how SuperLife^{Age Steps} - Age 20 has performed and what fees were charged. The document will help you to compare the stage with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this stage

SuperLife^{Age Steps} automatically sets the proportion of your investment in income and growth assets based on your age. As you get older, the proportion of your investment in more volatile growth assets will be reduced, lowering the expected size of the ups and downs in the value of your investment. This option may be suitable if you are saving for retirement (assumed to be age 65), and assumes you will continue to invest your savings and spend them over your retirement period.

Your SuperLife^{Age Steps} - Age 20 investment will be allocated 4% to SuperLife^{Income} and 96% to SuperLife¹⁰⁰ (which are managed funds this stage invests in).

What are the risks of investing?

Risk indicator for SuperLife^{Age Steps} - Age 20²

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the stage's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <u>www.sorted.org.nz/tools/investor-kickstarter</u>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a stage's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about the risks associated with investing in this stage

How has the stage performed?

| | Past year |
|---|-----------|

| Annual return (after deductions for charges but before tax) | 17.37% |
| Market index annual return (reflects no deduction for charges and tax) | 18.91% |

The market index annual return is based on the weighted average annual return of the market indices used to measure the performance of the assets that the stage invests in. Additional information about the market index is available in the 'Other Information' document on the offer register at <u>www.business.govt.nz/disclose</u>.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the stage started. The last bar shows the average annual return since the stage started, up to 31 December 2017.

Important: This does not tell you how the stage will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the SuperLife^{Age Steps} - Age 20 are charged fund charges. In the year to 31 March 2017 these were:

| | % per annum of stage's net asset value | |
|--|---|--|
| Total fund charges | 0.53% ³ | |
| Which are made up of: | | |
| Total management and administrat | ninistration 0.53% ³ | |

Notes

- SuperLife^{Age Steps} Age 20 does not currently have any investors. The information in this document sets out our estimates as to how SuperLife^{Age Steps} Age 20 would have performed and what fees would have been charged if it had investors. These estimates are based on our experience in respect of SuperLife^{Age Steps} Age 20 in the other SuperLife managed investment schemes.
- 2 Market index returns (as well as actual returns) have been used to complete the risk indicator as SuperLifeAge Steps Age 20 invests in SuperLife^{Income} and SuperLife¹⁰⁰ (together with the NZ Cash Fund), which have not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of SuperLife^{Age Steps} Age 20. The risk indicator for SuperLife^{Age Steps} Age 20 uses 9 months of market index returns for SuperLife^{Income} and SuperLife¹⁰⁰.
- 3 On 7 December 2017, the total management and administration charges changed to 0.63% per annum. As a result, the total fund charges will be different in the year to 31 March 2018.
