

Fund Update

SuperLife UK pension transfer scheme

Australian Shares Fund

For the quarter ended 31 March 2017.

This fund update was first made publicly available on 28 April 2017.

What is the purpose of this update?

This document tells you how the Australian Shares Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Australian Shares Fund is designed to provide a return (after tax, fees and other expenses) that reflects the after-tax return on the Australian share market.

Total value of the fund:	\$744,315
Number of investors in the fund:	40
The date the fund started:	24 July 2012

What are the risks of investing?

Risk indicator for the Australian Shares Fund ¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Other specific risks

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include investment management risk. In particular, while the SuperLife UK pension transfer scheme's philosophy is that a passive approach to investing will deliver better long-term results, we make some active management decisions. There is a risk that this may result in the fund achieving a return that is lower than its investment objective.

There is also a risk that UK tax law changes and as a result the SuperLife UK pension transfer scheme loses its recognised overseas pension scheme (ROPS) status. There is also a risk that the UK's rules for ROPS change. We will not be liable for any loss you may suffer if this happens.

See the "Other Information – Risks" document on the offer register at www.business.govt.nz/disclose for further information about the risks of investing in the SuperLife UK pension transfer scheme.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	20.55%
Annual return (after deductions for charges but before tax)	21.95%
Market index annual return (reflects no deduction for charges and tax)	19.66%

The market index annual return is based on the annual return of the S&P/ASX 200 Index (50% NZD hedged). Additional information about the market index is available on the offer register at www.business.govt.nz/disclose.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Australian Shares Fund are charged fund charges. In the year to 31 March 2017 these were:

	% per annum of fund's net asset value
Total fund charges	0.49% ²
Which are made up of:	
Total management and administration charges	0.49% ²
Including:	
Manager's basic fee	0.27%
Other management and administration charges	0.22%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor
Administration fee	\$60 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for transferring money into the scheme from a UK pension scheme). See the "Other Information – Fees" document on the offer register at www.business.govt.nz/disclose for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$2,055 (that is 20.55% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$1,995 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Asset Category	Target asset mix

Further information

You can also obtain this information, the Product Disclosure Statement for the SuperLife UK pension transfer scheme, and some additional information, from the offer register at www.business.govt.nz/disclose.

Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 4 months of market index returns.
- 2 On 9 November 2016, the total management and administration charges changed to 0.54% per annum. As a result, the total fund charges will be different in the year to 31 March 2018.
